

APPENDIX I

The following is a clean copy of the paragraph beginning at page 17, line 22 as amended in the Amendment and Response.

Q1 "In the preferred embodiment illustrated in FIG 1, a cured hardened resin mixture 18 is illustrated as surrounding the stacked plates, including the shield base plate and shroud, by phantom lines representing the exterior margin of the resin, containing therein random particles of magnesium carbonate powder mixed therein. In a preferred embodiment, the resin mixture comprises polyester resin and styrene monomer, with talc, magnesium carbonate powder and sodium borosillicate mixed therein."
